

Women in Energy Internship Program

— RENEWABLE ENERGY ENGINEER (FEMALE)

About the Company

ELEN is a private company which deals with the provision of products and services in the field of Electrical Engineering and Renewable Energy. ELEN specializes in providing design services for solar photovoltaic systems, installation of electro-energy systems, technical consulting and energy efficiency solutions. For more information, visit: <https://elen-ks.com/al/>

Job Description

The engineer has the following duties:

- Comprehensive analysis of the project (duty), compiling bid requests for suppliers or subcontractors; making a comparative analysis between the bids received from the technical and financial and administrative aspect, keeping correspondence with these parties for technical and financial aspects, for product selection and other technical issues.
- Organizing the tasks of technicians and reporting on their effectiveness in fulfilling office and field tasks.
- Applying current objectives to Elen and coming up with proposals that are feasible.

Qualifications

In addition to the general criteria, the engineer must also have these qualifications:

- Basic knowledge of products/materials in the field of Renewable Energy, e.g. Solars.
- Knowledge on dimensioning of conductors, protections, etc.
- Basic knowledge of AutoCAD.
- Knowledge of Microsoft Office suite.
- To have attended at least one training on electrical installations and design.
- Knowledge of measuring units and their application, such as: A, W, V, kVAr, m, m², m³.
- Knowledge of English language.
